INTUNE NATIVE REPORTS ARE GREAT!!

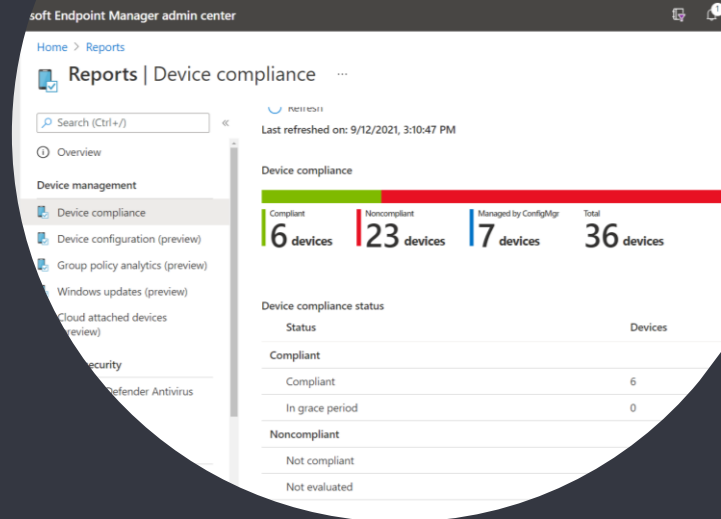

Why Azure Monitor ?

**What do we
have now?**

Current Reporting Options

Device Compliance

- Particularly useful when implementing conditional based access requirements
- Monitor your device compliance trends over time

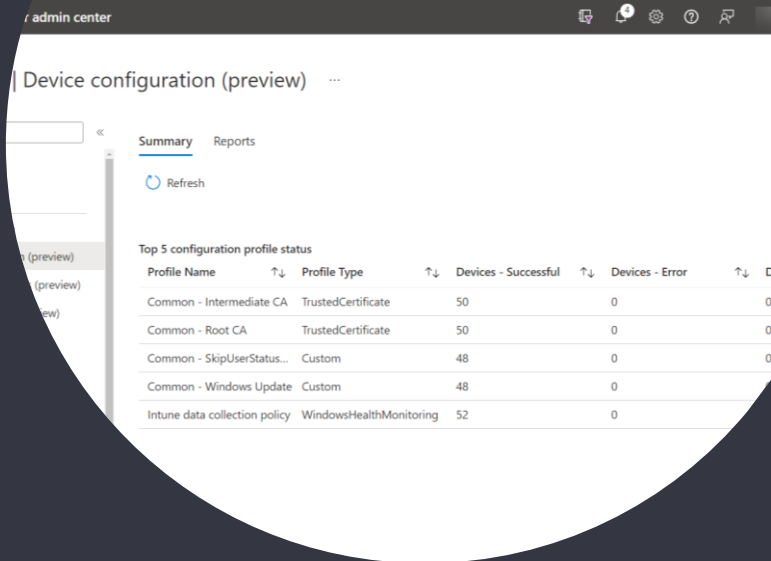

Current Reporting Options

Device Compliance

- Particularly useful when implementing conditional based access requirements
- Monitor your device compliance trends over time

Device Configuration

- Provide insights how device configuration policy and endpoint security profiles are applied to the devices

Current Reporting Options

Device Compliance

- Particularly useful when implementing conditional based access requirements
- Monitor your device compliance trends over time

Device Configuration

- Provide insights how device configuration policy and endpoint security profiles are applied to the devices

Group Policy analytics

- Determine how your GPOs translate in the cloud. The output shows which settings are supported in MDM providers

admin center

Home > Reports >

Group policy migration readiness

Columns Export

Generate again

Search by setting name, migration readiness, CSP name, OS version, scope, MDM mapping, profile type, or category

Showing 1 to 50 of 74 records

Setting Name ↑↓	Group Policy Sett... ↑↓	Migration Readin... ↑↓	Min OS Version ↑↓	Scope ↑↓
Allow Cortana	Windows Components...	Ready for migration	15063	Computer
Enable OneDrive Files On-Demand	OneDrive	Not supported	0	Computer
Rules/0477e689-5eea-4fa4-b8df-6...		Ready for migration	16299	Computer
